MAINTENANCE

Periodic cleaning with a mild solution of warm water and dish detergent is all that is needed to keep strap looking bright and shiny. Cleaning agents containing petroleum base ingredients should be avoided. Suntan lotion, insect sprays, and chemical solvents are harmful to the surface of this material, and should be removed immediately with detergent. Cold weather will not harm strap, provided reasonable care is exercised in handling furniture. However, impact blows in temperatures below 20°F. may cause fracturing. The vinyl does contain a mildew inhibitor which is effective for approximately 18 months. After that, mildew can be prevented by a number of products available in local hardware stores or supermarkets.

SOME QUESTIONS ANSWERED

Q. What do you really mean by "action seating?" Why is your action better?

A. Action seating—seating that moves with a person's normal body motions such as twisting, reclining, rocking—really means COMFORT. No one sits still, even in a non-action chair. When the seat allows for body motions, you can remain COMFORTABLE for a long time.

Homecrest's action is superior. We have been making action seating for over 30 years, and have patented several important features:

- our own coiled springs for smooth rocking
- spring adjustment to suit people of different weight
- tension adjustment knob on recliners
- correctly contoured seats for reducing fatigue

Q. What have you done to reduce maintenance on your furniture?

A. •Homecrest has developed a 9-step paint system: frames are cleaned, dried, ZinClok-primed, baked, painted, inspected (with special attention to critical areas), pre-baked, infrared fused, and hardened—for tough, long-lasting protection.

•Hardware is treated with Empigard® finish, proven to be 362% more resistant to weather, and which meets automotive industry standards.

•100% polyester fiber cushion filling will not rot or mildew.

•Protective nylon glides and feet for all floor contact points.

Proven protection—our zinc-rich dip coating gets into every nook and cranny to fight off corrosion.

Q. Does low maintenance mean that I can forget about cleaning my outdoor furniture?

A. No. Fine outdoor furniture is an investment, like fine indoor furniture, and should be periodically cleaned. Although mildew-resistant, cushions, slings and straps will keep their beauty best if protected from dirt. If dirt is left on the furniture, mildew will grow on the dirt.

Q. How do you make sure that the excellence in quality stays as high as you say it is?

A. We keep quality high by designing and building the excellence into the product. We also test our product to insure that our performance standards are being met.

The testing never stops:

The Mad Rocker: 1,000,000 rocks, or back to the drawing board.

Sock-It-To-Me-Test: a 620-pound punch—but no bucking allowed.

Rock 'n Roll Machine: torture test for legs.

Salt Spray Booth: definitely an unfriendly atmosphere to see what can take it—and what can't.
